

ALL JOBS ARE EQUALLY IMPORTANT AT JBS!

We understand that when your press is down you need it in service as soon as possible. Getting you back in production is our goal, regardless of the size or nature of the job, whether it is a simple adjustment, minor repair, complete rebuild, or anything between.

DETAILED INSPECTIONS TO FIT YOUR NEEDS

JBS has highly skilled Field Service Technicians who are experts in inspection, maintenance, repair and installation of mechanical presses. Years of field experience allow us to inspect, troubleshoot and supervise repairs for all styles of mechanical presses and hydraulic presses. JBS will supply information regarding the condition of your press so that you can accurately predict wear and premature failure of various systems and components. Combined with a preventative maintenance program, inspection of your press will help eliminate downtime of your equipment and track the progression of wear.

COMPLETE PRESS REPAIR SERVICES

JBS has the expertise and the equipment to handle your largest industrial repairs.

Experienced in all makes and models.

DIVERSE CAPABILITIES

Our wide ranging services include but are not limited to:

-  **Machining and fabricating**
-  **Forging, hydraulic press repairs and troubleshooting**
-  **Reverse Engineering**
-  **Preventative maintenance programs and contracts**
-  **Training classes**
(preventative maintenance, troubleshooting, etc.)
-  **Project management**

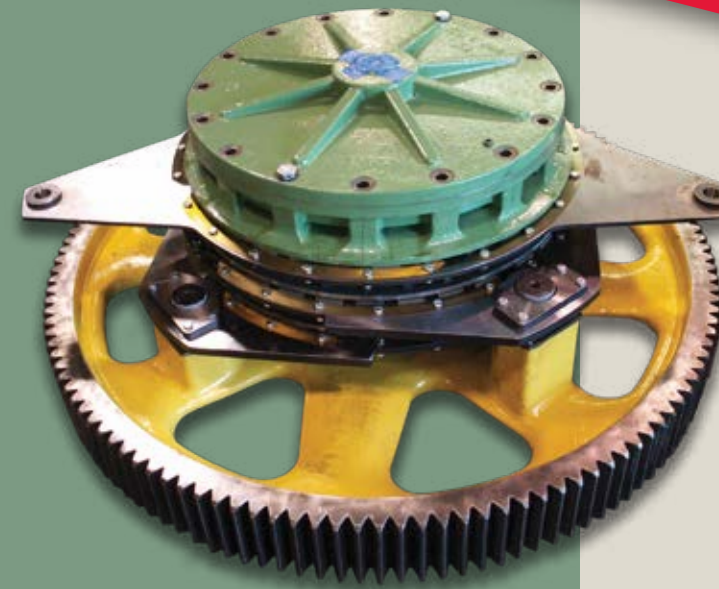

JOHN BOUCHARD & SONS CO. UNDERSTANDS THAT PRESS BREAKDOWNS MEAN LOST PRODUCTION AND LOST PROFITS.

Our specialists are on call to offer everything from troubleshooting and minor repairs to complete rebuilds. Our machine shop and other mechanical divisions provide a deep resourced background for any press project.

JBS offers complete press repair services to get your operation back up and running on time.

JBS services all models, types and brands of press machinery, and will repair your equipment on location if at all possible.

JBS will perform maintenance, repair, upkeep and partial rebuilds – which are more common than a total rebuild. Our service may include simple adjustments, replacement parts, reconditioning, rebuilding, or even re-engineering and making a new part.
