

JOHN BOUCHARD & SONS CO.

— SINCE 1900 —

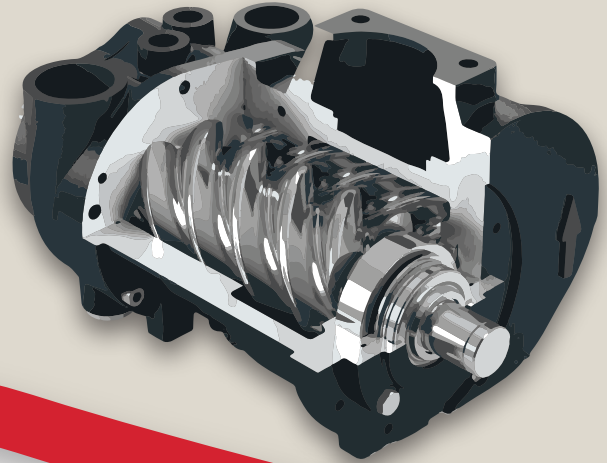

LOCAL AIREND REBUILD CENTER

JBS is a premier rebuilder of rotary screw air compressor airends of all makes and models. We have the only in-house rebuild service center in the area. We are equipped with the right tools and experienced talent to provide quick turnarounds and quality rebuilds to OEM standards.

MAXIMIZE YOUR INVESTMENT

At a fraction of the cost of a new machine, rebuilding the airend of your compressor is often the most economical way to maximize your investment. JBS rebuilds are also less expensive than factory-exchanged airends with **warranty options available.**

COMPRESSED AIR SOLUTIONS AIREND REBUILDS

OUR REBUILD PROCESS

- Disassemble & immersion clean complete airend.
- Replace all bearings, seals, gaskets, and O-rings with OEM or better quality parts.
- Inspect all bearing pockets and bores; check alignments on housing and end plates.
- If additional repairs are required, we will quote after inspection.
- Inspect and check rotors for proper balance and alignment.
- Check clearances and fits during reassembly to ensure OEM-specified accuracy.
- Rebuilt airend is cleaned, painted, and prepared for shipping.
